Int J Biomed Comput, 27 (1991) 299—300
Elsevier Scientific Publishers Ireland Ltd.

CONTENTS

Volume 27 (1991)

Commentary ..... 1—6
Computers to do surgery
ECG compression tecnhiques: towards a unified view
Seeking compatible human-computer interfaces
J.G. Llaurado (U.S.A.)
Factors influencing the transferability of medical decision support systems
J. Nolan, P. McNair and J. Brender (Hvidovre and Birkerod, Denmark) ..... 7—26
An application of the non-linear bifurcation theory to tumor growth modeling
P.G. Vaidya, V.G. Vaidya and D.G. Martin (Pullman and Seattle, WA) ..... 27—46
'Solubile': decision-making in the diagnosis of jaundice
E.W.F.W. Alton, N. Newman, J. Hooper, D. Fok and F.R. Vicary (London, U.K.) ... 47—57
Global tracking of the ocular fundus pattern imaged by scanning laser ophthalmoscopy
T. Bantel, D. Ott and M. Rueff (Stuttgart and Dusseldorf, F.R.G.) ..... 59—69
Commentary ..... 71—76
Computers versus snakes: 'Poisindex'
Dual-sensor pacemaker: emotions and physical activity
Fertility monitor: 'L Sophia'
Mathematical modeling of healing in osseous fractures
J.G. Llaurado (U.S.A.)
Fuzzy K-nearest neighbour classifiers for ventricular arrhythmia detection
D. Cabello, S. Barro, J.M. Salceda, R. Ruiz and J. Mira (Santiago de Compostela, Murcia and Madrid, Spain) ..... 77—93
Quantitative analysis of electroencephalograms: Is there chaos in the future?
B.H. Jansen (Houston, TX) ..... 95—123
Use of chi square periodogram in the analysis of estrous rhythmicity
R. Refinetti (Charlottesville, VA) ..... 125—132
Polychotomous multivariate models for coronary heart disease simulation. I. Tests of a logistic model
Z. Zhou, E. Ackerman, L. Gatewood, T. Kottke, S.-C. Wu and H.-A. Park (Minneapolis, MN) ..... 133—148
Calendar of Events ..... 149—150
Commentary ..... 151—155
Advances in digital radiology (PACS)
Cataracts: temporal evaluation of changes in lens opacity
J.G. Llaurado (U.S.A.)
Application of the entropy theory of perception to auditory intensity discrimination
K.M.V. Mc Conville, K.H. Norwich and S.M. Abel (Toronto, Canada) ..... 157—173
Evaluation of receiver operator characteristics — optimum time of day for the assessment of heart rate variability after acute myocardial infarction
M. Malik, T. Farrell, J. Poloniecki and A.J. Camm (London, U.K.) ..... 175—192
REPLI: a program in basic for determination of approximate sample size
A. Luttke (Koln, F.R.G.) ..... 193—200

Variable selection for the classification of postoperative cardiac patients
E. Artioli, G. Avanzolini, P. Barbini and G. Gnudi (Bologna and Siena, Italy) ..... 201—213
New deterministic methods for global optimization and applications to biomedicine
Y. Cherruault (Paris, France) ..... 215—229
Time trends of smoking cessation analyzed with six mathematical survival models
M. Elketroussi and D.P. Fan (Minneapolis and St. Paul, MN) ..... 231—244
Grammatic representation of beat sequences for fuzzy arrhythmia diagnosis
S. Barro, R. Ruiz, J. Presedo and J. Mira (Madrid, Spain) ..... 245—259
Time series versus Fourier transform methods for estimation of respiratory impedance spectra
K.A. Davis and K.R. Lutchen (Boston, MA) ..... 261—276
A computerized test battery for the assessment of cardiovascular reactivity
T.T. Debski, T.W. Kamarck, J.R. Jennings, L.W. Young, M.J. Eddy and Y. Zhang (Pittsburgh, PA) ..... 277—289
Calendar of Events ..... 291—292
Subject Index Volume 27 (1991) ..... 293—295
Author Index Volume 27 (1991) 297
Contents Volume 27 (1991) ..... 299—300
